

Did you know that cost plans are reviewed in the order that they are received by the SCO.

When a cost plan is received by the SCO, it is logged in. Each analyst works through their assigned cost plans on the basis of when they were received. Occasionally an analyst will deviate from this, but only at the request of the county or to facilitate a field review.

For this reason, if an approval in the spring is very beneficial to your county, you may want to concentrate on getting your plan submitted as early as possible.
